DataStage, SQL Server, Azure Data Platform, Databricks

DW architecture, Data lakehouse architecture

Enabling data driven decision making

Agenda

- Culture and Data culture
- Importance of leadership
- Roles and responsibilities
- Data community
- Training
- Architecture patterns
- Content ownership and target audience

Why is this topic important?

What is culture?

Culture

[Article](#) [Talk](#)

From Wikipedia, the free encyclopedia

For other uses, see [Cell culture](#), [Tissue culture](#), and [Culture \(disambiguation\)](#).

Culture (/ˈkʌltʃər/ *KUL-chər*) is a concept that encompasses the [social behavior](#), [institutions](#), and [norms](#) found in [human societies](#), as well as the [knowledge](#), [beliefs](#), [arts](#), [laws](#), [customs](#), [capabilities](#), [attitude](#), and [habits](#) of the individuals in these groups.^[1] Culture is often originated from or attributed to a specific region or location.

What is data culture?

“the collective behaviors concerning data that people in an organization have adapted”

Importance of leadership

The scope of your data culture will often be limited to the influence that your sponsor have.

Roles and responsibilities

Team

Executive
sponsor

Foster a data community

Importance of training

*Technical training
&
Process training*

Rome was not built in a day

Architecture patterns

Content ownership

Enterprise

Managed
self-service

Business-led
self-service

Data ownership

Centralized:
Content owned and
managed by BI or IT

Centralized

Decentralized

Report ownership

Centralized

Decentralized

Decentralized:
Content owned and
managed by the
business unit

Symptoms of a decentralized architecture

Build an architecture that will last

Target audience

Personal

Intended for use by **one** creator - sharing isn't an objective

Team

Collaboration & sharing of content with a **small** # of colleagues who work closely together

Departmental

Content delivery to a **larger** # of consumers within a department or business unit

Enterprise

Content delivery across organizational boundaries to the **largest** # of target consumers

Content ownership vs Target audience

**Why does data
culture matter?**
